(a) displacement response coefficient, $k_{\rm split} = 0.2$
C_2/D^2 $[(h^{-1}{\rm Mpc})^2]$
D
3LPT
5LPT
7LPT
LPT$_\infty$ (Shanks)
PM, plane waves ($\varepsilon\to0$)
PM, waves on long background a = 0.5
PM, waves on long background a = 1
PM, random long field (§6)
(b) departure from the pressureless series
D
shell-crossed mass fraction (PM)
$C_2^{\rm PM} - C_2^{\rm 7LPT}$, a = 0 (pure counterterm)
$C_2^{\rm PM} - C_2^{\rm 7LPT}$, a = 0.5
$C_2^{\rm PM} - C_2^{\rm 7LPT}$, a = 1
